

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Please amend claims 1, 3-6, 9, 11-14, 17, 19-22, 25 and 27-30 as indicated below (material to be inserted is in **bold and underline**, material to be deleted is in ~~strikeout~~ or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[]]):

Listing of Claims:

1. (Currently Amended) A method comprising:
adding a plurality of files to a presentation profile;
specifying ~~a set of packaging and~~ a set of **individual** printing characteristics with respect to individual **each** ones of the files;

specifying a set of individual packaging characteristics with respect to each of the files; and

responsive to a single print request, printing **a presentation package including** each of the files in the presentation profile based on the **individual** packaging **characteristics** and **individual** printing characteristics **corresponding to each of the files.**

2. (Original) A method as recited in claim 1, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.

3. (Currently Amended) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

~~identifying individual ones of the files that are not included in a general distribution package~~ **identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.**

4. (Currently Amended) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

selecting one or more options to identify how at least one subset of the files **of the presentation package** are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

5. (Currently Amended) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to ~~at least a~~ **the** subset of the files that are for **to be included in the** general audience distribution **package**.

6. (Currently Amended) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

indicating a number of copies to print with respect to ~~at least a~~ first subset of the files that are ~~independent of at least a second subset of the files that are for general audience distribution~~ **to be included in the presentation package.**

7. (Original) A method as recited in claim 1, wherein specifying the printing characteristics further comprises:

identifying a specific printer to print each of the files.

8. (Original) A method as recited in claim 1, wherein specifying the printing characteristics further comprises:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

9. (Currently Amended) A computer-readable medium comprising computer-executable instructions to print a plurality of files in a presentation, the computer-executable instructions comprising instructions for:

adding a plurality of files to a presentation profile;

specifying ~~a set of packaging and~~ a set of **individual** printing characteristics with respect to individual **each** ones of the files;

specifying a set of individual packaging characteristics with respect to each of the files; and

responsive to a single print request, printing **a presentation package including** each of the files in the presentation profile based on the **individual** packaging **characteristics** and **individual** printing characteristics **corresponding to each of the files.**

10. (Original) A computer-readable medium as recited in claim 9, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.

11. (Currently Amended) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

~~identifying individual ones of the files that are not included in a general distribution package~~ **identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.**

12. (Currently Amended) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

selecting one or more options to identify how at least one subset of the files **of the presentation package** are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

13. (Currently Amended) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to ~~at least a~~ **the** subset of the files that are ~~for~~ **to be included in the** general audience distribution **package**.

14. (Currently Amended) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

indicating a number of copies to print with respect to at least a first subset of the files that are independent of at least a second subset of the files that are ~~for general audience distribution~~ **to be included in the presentation package**.

15. (Original) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the printing characteristics further comprising instructions for:

identifying a specific printer to print each of the files.

16. (Original) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the printing characteristics further comprising instructions for:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

17. (Currently Amended) A computing device comprising:

a memory comprising computer-executable instructions for automatically printing each file in a presentation ~~presentation~~ profile;

a processor that is operatively coupled to the memory, the processor being configured to fetch and execute the computer-executable instructions from the memory, the computer-executable instructions comprising instructions for:

adding a plurality of files to a presentation profile;

specifying ~~a set of packaging and~~ a set of **individual** printing characteristics with respect to ~~individual~~ **each** ~~ones~~ of the files;

specifying a set of individual packaging characteristics with respect to each of the files; and

responsive to a single print request, printing **a presentation package including** each of the files in the presentation profile based on the **individual** packaging **characteristics** and **individual** printing characteristics **corresponding to each of the files.**

18. (Original) A computing device as recited in claim 17, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.

19. (Currently Amended) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

~~identifying individual ones of the files that are not included in a general distribution package~~ **identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.**

20. (Currently Amended) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

selecting one or more options to identify how at least one subset of the files of the presentation package are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

21. (Currently Amended) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to ~~at least a~~ the subset of the files that are for **to be included in the** general audience distribution **package**.

22. (Currently Amended) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

indicating a number of copies to print with respect to at least a first subset of the files that are independent of at least a second subset of the files that are ~~for general audience distribution~~ **to be included in the presentation package**.

23. (Original) A computing device as recited in claim 17, wherein the instructions for specifying the printing characteristics further comprising instructions for:

identifying a specific printer to print each of the files.

24. (Original) A computing device as recited in claim 17, wherein the instructions for specifying the printing characteristics further comprising instructions for:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

25. (Currently Amended) A user interface comprising:

a first area for adding a plurality of files to a presentation profile;

a second area for specifying a set of **individual** packaging characteristics with respect to individual **each** ones of the files;

a third area for indicating a set of **individual** printing characteristics with respect to individual **each** ones of the files; and

a fourth area for printing **a presentation package including** each of the files in the presentation profile in response to a single print request, the printing being based on the **individual** packaging **characteristics** and **individual** printing characteristics **corresponding to each of the files**.

26. (Original) A user interface as recited in claim 25, wherein a first subset of the files are generated using a first computer program application, and wherein a second subset of the files are generated using a second computer program application that is different than the first computer program application.

27. (Currently Amended) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for ~~identifying individual ones of the files that are not included in a general distribution package~~ **identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files**.

28. (Currently Amended) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for selecting one or more options to identify how at least one subset of the files **of the presentation package** are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

29. (Currently Amended) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for identifying a subset of files that are to be included in a general distribution package and indicating a number of copies to print with respect to ~~at least a~~ the subset of the files that are ~~for~~ to be included in the general audience distribution package.

30. (Currently Amended) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for indicating a number of copies to print with respect to at least a first subset of the files that are ~~independent of at least a second subset of the files that are for general audience distribution~~ to be included in the presentation package.

31. (Original) A user interface as recited in claim 25, wherein the third area for specifying the printing characteristics further comprises:

a fifth area for identifying a specific printer to print each of the files.

32. (Original) A user interface as recited in claim 25, wherein the third area for specifying the printing characteristics further comprises:

a fifth area for indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.
